Specialized in building scalable backend systems and APIs using MERN stack, optimizing code efficiency by 30%. Collaborated across teams to deploy 5+ full-stack projects. Proficient in React.js, Bootstrap, and API integration for high-performance web applications.

INTERNSHIP

MERN Stack Developer Intern

Jan 2025 - Apr 2025

Cybrom Technology Pvt. Ltd. , Bhopal

- Developed a full-stack e-commerce platform with secure payments, supporting 500+ user transactions.
- Built and integrated **secure RESTful APIs** with Node.js, Express, and MongoDB, enabling real-time data interaction for **1,000+ users**.
- Implemented **user authentication and authorization** with JWT and role-based access control, reducing security vulnerabilities by **90%**.
- Designed responsive front-end UIs using **React, Bootstrap CSS, and Redux**, enhancing mobile user engagement by **40%**.

PROJECTS

Ebanking

Feb 2025 - Feb 2025

An e-banking project, also known as an electronic banking project, focuses on developing and implementing systems that allow customers to conduct banking transactions online, such as internet banking, mobile banking, and ATM services, providing convenience and accessibility link.

- Developed an e-banking system enabling users to perform secure online transactions via web and mobile platforms.
- Implemented core features like fund transfers, transaction history, and balance inquiries to enhance user convenience.
- Integrated multi-factor authentication and encryption to ensure data security and user privacy.
- Improved accessibility and reduced in-branch traffic by providing 24/7 digital banking services.

Ecommerce

Mar 2025 - Apr 2025

An e-commerce project involves **creating a platform to facilitate online buying and selling of goods or services, encompassing website development, inventory management, payment processing, and customer service, all aimed at enabling seamless transactions.**

React | Redux | Node.js | Express.js | MongoDB | Razorpay

- Built a full-stack e-commerce application with essential features like product listings, cart, user authentication, and payment integration, supporting over 500 transactions.
- Reduced cart update latency by **30%** through optimized state management and API response handling.
